试题

题号	一	二	三	四	总分
分数					

1. 考试形式: 闭卷 ☐ 开卷 ☐ ; 2. 本试卷共三大题, 满分 100 分;
3. 考试日期: 2022 年 月 日; (答题内容请写在装订线外)

Part I Listening Comprehension (35%)

Section A

Directions: In this section, you will hear three news reports. At the end of each news report, you will hear two or three questions. Both the news report and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on Answer Sheet with a single line through the centre.

News Report One

Questions 1 and 2 are based on the news report you have just heard.

1. A) It was dangerous to live in.
B) It was going to be renovated.
C) He could no longer pay the rent.
D) He had sold it to the royal family.
2. A) A strike.
B) A storm.
C) A forest fire.
D) A terrorist attack.

News Report Two

Questions 3 and 4 are based on the news report you have just heard.

3. A) They lost contact with the emergency department.
B) They were trapped in an underground elevator.
C) They were injured by suddenly falling rocks.
D) They sent calls for help via a portable radio.
4. A) They tried hard to repair the elevator.
B) They released the details of the accident.
C) They sent supplies to keep the miners warm.
D) They provided the miners with food and water.

News Report Three

Questions 5 and 7 are based on the news report you have just heard.

5. A) Raise postage rates.
B) Improve its services.
C) Redesign delivery routes.
D) Close some of its post offices.
6. A) Shortening business hours.
B) Closing offices on holidays.
C) Stopping mail delivery on Saturdays.
D) Computerizing mail sorting processes.
7. A) Many post office staff will lose their jobs.
B) Many people will begin to complain.
C) Taxpayers will be very pleased.
D) A lot of controversy will arise.

Section B

Directions: In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C), and D). Then mark the corresponding letter on Answer Sheet with a single line through the centre.

Conversation One

Questions 8 to 11 are based on the conversation you have just heard.

8. A) They pollute the soil used to cover them.
B) They are harmful to nearby neighborhoods.
C) The rubbish in them takes long to dissolve.
D) The gas they emit is extremely poisonous.
9. A) Growing population.
B) Packaging materials.
C) Changed eating habits.
D) Lower production cost.
10. A) By saving energy.
B) By using less aluminum.
C) By reducing poisonous wastes.
D) By making the most of materials.
11. A) We are running out of natural resources soon.
B) Only combined efforts can make a difference.
C) The waste problem will eventually hurt all of us.
D) All of us can actually benefit from recycling.

Conversation Two

Questions 12 to 15 are based on the conversation you have just heard.

12. A) Since he found a girlfriend.
B) Since he took to heavy smoking.
C) Since he began to exercise regularly.
D) Since he started to live on his own.
13. A) He is getting too fat.
B) He smokes too much.
C) He doesn't eat vegetables.
D) He doesn't look well at all.
14. A) They are overweight for their age.
B) They are respectful to their parents.
C) They are still in their early twenties.
D) They dislike doing physical exercise.
15. A) To quit smoking.
B) To find a girlfriend.
C) To reduce his weight.
D) To follow her advice.

Section C

Directions: In this section, you will hear three passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C), D). Then mark the corresponding letter on Answer Sheet with a single line through the centre.

Passage One

Questions 16 to 18 are based on the conversation you have just heard.

16. A) People have different personalities.
B) People can learn to recognize faces.
C) People differ from each other in facial features.
D) People have difficulty in describing the features of fingerprints.
17. A) The ability to describe each other.
B) The gift of recognizing human faces.
C) The gift of telling good people from bad people.
D) The ability to tell people apart by how they behave.
18. A) The movie actors.
B) Psychologists.
C) The modern TV audience.
D) The ancient Greek audience.

Passage Two

Questions 19 to 21 are based on the passage you have just heard.

19. A) The actors and actresses only perform in their own communities.
B) The actors and actresses are not paid for their performance.
C) They exist only in small communities.
D) They only put on shows that are educational.
20. A) It provides them with the opportunity to make friends.
B) It provides them with the opportunity to watch performance for free.
C) It gives them the chance to do something creative.
D) It gives them a chance to enjoy modern art.
21. A) It educates and improves the community.
B) It produces good films for film companies.
C) It trains good actors and actresses to perform in films.
D) It is the place where people can enjoy modern art.

Passage Three

Questions 22 to 25 are based on the passage you have just heard.

22. A) Three types of noise that can make communication difficult.
B) The meaning of external noise.
C) The effect of cigarette smoke.
D) The reason why you can become speechless.
23. A) External noise.
B) Physiological noise.
C) The effect of a cold.
D) Psychological noise.
24. A) Various forces outside the sender or receiver that make these people unable to communicate.
B) Various difficulties that a listener or receiver can experience when they have a cold or are very tired.
C) Various forces within the sender or receiver that make them less able to communicate.
D) Various reasons that make a person unable to take full advantage of his talents.
25. A) Sympathetic.
B) Matter of fact.
C) Worried.
D) Exaggerated

Part II Reading Comprehension (35%)

Section A

Directions: In this section, there is passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please choose the corresponding letter for each item on Answer Sheet (Section A). You may not use any of the words in the bank more than once.

Culture is the sum total of all the traditions, customs, beliefs, and ways of life of a given group of human beings. In this A1, every group has a culture, however savage, undeveloped, or uncivilized it may seem to us.

People once thought of the languages of backward groups as savage and undeveloped forms of speech, A3 largely of grunts and groans. While it is possible that language in general began as a series of grunts and groans, it is a fact established by the study of "backward" languages that no spoken tongue answers that description today. Most languages of uncivilized groups are, by our most severe standards, extremely complex, delicate, and ingenious pieces of machinery for the A4 of ideas. They fall behind Western languages not in their sound patterns or A5 structures, which usually are fully adequate for all language needs, but only in their vocabularies, which A6 the objects and activities known to their speakers. Even in this department, however, two things are to be noted: First, all languages seem to A7 the machinery for vocabulary expansion, either by putting together words already in existence or by borrowing them from other languages and A8 them to their own system. Second, the objects and activities requiring names and distinctions in "backward" languages, while different from ours, are often surprisingly A9 and complicated.

注意：此部分试题请在答题卡“Section A”部分作答。

A) consisting	F) grammatical	K) exclusive
B) superiority	G) reflect	L) adapting
C) conceive	H) reveals	M) sense
D) transfer	I) numerous	N) confidentially
E) identification	J) independently	O) possess

Section B

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each statement is marked with a letter. Answer the questions by marking the corresponding letter on Answer Sheet (Section B).

The Morality Test

A) From cancer to Alzheimer's to diabetes, advances in genetic science mean that many of us are soon going to know – or at least have the option to know – more about our risks for a wide range of illnesses than we'd ever thought possible. On the surface, that sounds like a good thing, and it is in many respects. But while knowledge may be power, genetic testing also brings with it tremendous physical and psychological collapse. In the past two decades, the number of genetic tests available has jumped from a few hundred to nearly 3,000. Rebecca Nagy, president of the National Society of Genetic Counselors (NSGC), recalls that when she entered the field 15 years ago, it took a year to get the results of a BRCA test. Today, you get them back in a week or two.

- 第 6 页 共 14 页

the process, and not simply because of the heartbreak it brings loved ones. Learning that a family member has a particular mutation can suddenly force brothers and sisters, children and parents to confront unsettling questions about their own genes – questions that many people would prefer not to have raised at all.

- G) To facilitate sharing, medical facilities are increasingly providing aid and guidance. Visvanathan's clinic invites patients to have family come in and talk with the staff. "We try to take some of that burden," she explains. Hospitals at places like Georgetown University and the University of Pennsylvania often provide patients with letter templates tailored specifically toward informing family. Then there's the long-term challenge of living with a genetic ghost hiding in the background. At times, the anxiety can cause great damage, says Berry. "People talk frequently about how they go through periods—and I suspect it's true of anyone who faces a chronic illness or potentially fatal disease – periods that last days, weeks, months, or even years when there's a hyper-alertness about the body." Every twitch, twinge, or tickle spurs a raw terror that the illness has begun to take hold. "People say they're convinced they have the disease even though there's nothing obviously symptomatic about them," Berry says.
- H) For the medical community, addressing these challenges will mean changing medical-school curricula and investing in continuing education. "It means us going out to physicians' offices and helping them understand when it's appropriate to refer a person to a genetic counselor," Nagy says. "It's making them feel comfortable that, once referred, their patients will come back to them for ongoing care." Much more broadly, the general public is increasingly going to need a grasp of genetic basics to better manage their health, says Visvanathan. "Maybe the genetic aspects of health need to be brought into schools," she says. "Informing people at a young age would be helpful." Where and when this education should take place is, in fact, already under discussion. "I was at a conference last year in Boston where people were talking about how to educate elementary school kids," Nagy recalls.
- I) Equally important, there will be a need for more organizations to do the simple work of linking those facing similarly cloudy futures to one another. Having a support network of others who understand the fears, thoughts, medical peculiarities, and even the language of your disorder makes a huge difference, says Berry. "You see a positive effect when people realize that they are not journeying alone." In some cases, just having a regular chance to vent provides a measure of relief. "We have heard from patients that they love the support group because it allows them to gather all that negative energy, worry, and anxiety and spew it out in a one – or two-hour period," she says. "Then the rest of the month they don't have to think about it so much." But anxiety never fades entirely, says Berry. "It's always present, always niggling."
- J) Such is the burden of knowledge and, more specifically, foreknowledge. It is a burden more and more of us are going to have to decide whether to assume and one that our medical system is just beginning to learn how to help us shoulder. "This really is a slightly different pattern for medicine," says Brody. "It's going to take a lot of work."

注意：此部分试题请在答题卡“Section B”部分作答。

- B1 Visvanathan suggests educating students about the basic knowledge of genes in order to improve their health.
- B2 People with potential threat of Huntington's won't decide to have a gene test until a decision has to be made on whether to get married or have a baby.
- B3 The American College of Medical Genetics and Genomics suggests informing patients with certain gene problems of potential and possible risks of a certain disease.
- B4 We have to be aware of the negative effect of genetic testing, which may do harm to our body and mind.
- B5 According to Lawrence Brody, people can do tests with various complicated items at once in hospitals now since it costs much less to do them.
- B6 Usually when a family gets the news of a certain member's gene problem, they not only feel sad but also worry about themselves.
- B7 It's difficult for us to accept the bad result of a genetic test but doctors and experts are trying to find ways to help us learn how to bear it.
- B8 It will be good for people with genetic problems to find ways to release their pressure.
- B9 People are optimistic about their chances of being caught by an inherited disease before the genetic test is done.
- B10 People need courage to live with the fact of having a genetic problem for a long period and sometimes they become anxious.

Section C

Directions: There are two passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on Answer Sheet.

Passage One

Questions 26 to 30 are based on the following passage.

In department stores and closets all over the world, they are waiting. Their outward appearance seems rather appealing because they come in a variety of styles, textures, and colors. But they are ultimately the biggest deception that exists in the fashion industry today. What are they? They are high heels – a woman's worst enemy (whether she knows it or not). High heel shoes are the downfall of modern society. Fashion myths have led women to believe that they are more beautiful or sophisticated for wearing heels, but in reality, heels succeed in posing short as well as long term hardships. Women should fight the high heel industry by refusing to use or purchase them in order to save the world from unnecessary physical and psychological suffering.

For the sake of fairness, it must be noted that there is a positive side to high heels. First, heels are excellent for aerating (使通气) lawns. Anyone who has ever worn heels on grass knows what I am talking about. A simple trip around the yard in a pair of those babies eliminates all need to call for a lawn care specialist, and provides the perfect-sized holes to give any lawn oxygen without all those messy chunks of dirt lying around. Second, heels are quite functional for defense against oncoming enemies, who can easily be scared away by threatening them with a pair of these sharp, deadly fashion accessories.

Regardless of such practical uses for heels, the fact remains that wearing high heels is harmful

to one's physical health. Talk to any *podiatrist* (足病医生), and you will hear that the majority of their business comes from high-heel-wearing women. High heels are known to cause problems such as deformed feet and torn toenails. The risk of severe back problems and twisted or broken ankles is three times higher for a high heel wearer than for a flat shoe wearer. Wearing heels also creates the threat of getting a heel caught in a sidewalk crack or a *sewer-grate* (阴沟栅) and being thrown to the ground—possibly breaking a nose, back, or neck. And of course, after wearing heels for a day, any woman knows she can look forward to a night of pain as she tries to comfort her swollen, aching feet.

26. What makes women blind to the deceptive nature of high heels?
 - A) The multi-functional use of high heels
 - B) Their attempt to show off their status.
 - C) The rich variety of high heel styles.
 - D) Their wish to improve their appearance.
27. The author's presentation of the positive side of high heels is meant _____.
 - A) to be ironic
 - B) to poke fun at women
 - C) to be fair to the fashion industry
 - D) to make his point convincing
28. The author uses the expression "those babies" (Line 3, Para. 2) to refer to high heels _____.
 - A) to show their fragile characteristics
 - B) to indicate their feminine features
 - C) to show women's affection for them
 - D) to emphasize their small size
29. The author's chief argument against high heels is that _____.
 - A) they pose a threat to lawns
 - B) they are injurious to women's health
 - C) they don't necessarily make women beautiful
 - D) they are ineffective as a weapon of defense
30. It can be inferred from the passage that women should _____.
 - A) see through the very nature of fashion myths
 - B) boycott the products of the fashion industry
 - C) go to a podiatrist regularly for advice
 - D) avoid following fashion too closely

Passage Two

Questions 31 to 35 are based on the following passage.

The factor which influences human life more than any other is that man lives in groups. He is the product of a group (mother and father); he is nurtured by a group (family or family substitute); and he spends all his life, unless he chooses to be a *hermit* (隐士), interacting with and within groups

of various kinds.

The type of group most important to man is one in which the members are personally involved with each other on both an emotional and physical level, in which relations are characterized by informality, and in which these relations are stable and durable. Such a group is known in sociological terms as a primary group, and its foremost example is the family.

In small, non-technological, homogeneous societies, with members ranked on a more or less equal footing as to wealth, status, and privilege, the type of relations prevalent within a primary group exist at the level of the entire society. Such a society is referred to as a communal society.

In large, *heterogeneous* (混杂的), technologically advanced, competitive societies, where division of labor is practiced, and where consequent inequalities exist in wealth, status, and privilege, it becomes necessary for individuals to expand their interaction to secondary groups. Members of a secondary group do not tend to be emotionally involved with each other. Relations are mostly formal and partial since the members come together for a definite and temporary reason. Teacher and student, merchant and customer, doctor and patient are examples of secondary groups. A society in which these relationships prevail is termed an associational society.

Man's physical and emotional needs are best satisfied within societies, and the individual develops a sense of well-being, of belonging and fitting in. But, if they are not satisfied, the individual's normal development is hampered, and he tends to suffer feelings of not belonging.

Because of the nature of life in technologically advanced societies, man has had to rely increasingly on secondary group relationships. In the meantime, some facets of his primary group life have been gradually *disintegrating* (瓦解). The extended family, which was still very much a feature of American life at the turn of the century, consisted of grandparents, unmarried aunts and uncles, and various other relatives who lived either under the same roof or in the same community, and gave mutual aid and comfort to each other (along with occasional conflict).

Today's family, however, is reduced to the nuclear father, mother, and children, and with increased mobility access to grandparents and relatives is something impossible. The physically and emotionally supportive role which the extended family played has not been replaced by relationships within the secondary group.

31. In a primary group, members tend to _____.
 - A) be quite formal to each other on certain occasions
 - B) pass religious belief to other generations
 - C) communicate with each other in informal ways
 - D) keep a casual relationship with other people
32. In a communal society, members _____.
 - A) usually show no interest in new technology
 - B) enjoy relatively equal relations between others
 - C) adapt the standard of a family to the whole society
 - D) value their family status rather than the social one
33. Compared with a communal society, an associational one _____.
 - A) is marked by a highly advanced social system
 - B) gives high social status to people with skills

- C) stresses formal relations within a temporary group
- D) expands primary relations to even strangers

34. When a person's sense of well-being is not satisfied, _____.

- A) the feeling of alienation will dominate his or her heart
- B) the individual has to confine the emotional needs
- C) the individual is likely to revenge on the society
- D) an effort of developing the sense will be made

35. According to the author, in a nuclear family, _____.

- A) family members are indifferent to each other
- B) the primary family relation is between father and son
- C) grandparents no longer love their grandchildren
- D) a close tie between family members breaks up

Part III Translation (15%)

Directions: Please translate the following paragraph from Chinese into English. (注意: 此部分试题请在答题纸上作答)。

在英文中, “中国”与“瓷器”(porcelain)是一个词, 这说明, 很早的时期欧洲人就把中国与瓷器联系在一起的。瓷器 15 世纪时就传入欧洲, 在中外交流中占有重要位置。德国卡塞尔郎德 (Keisel Randy) 博物馆至今还藏有一件中国明代青瓷 (blue-and-white) 碗。历史上, 中国和亚洲的其他国家以及欧洲国家的瓷器交易极为频繁, 而且数量巨大。据今人研究, 在 1602-1682 年间, 仅荷兰东印度公司 (the Dutch East India Company) 从中国贩运到欧洲的瓷器就有一千六百多万件。瓷器以其优雅精致的品质, 为中国赢得了好名声。

Part IV Writing (15%)

Directions: For this part, you are allowed 30 minutes write a short essay entitled *My Ideal English Teacher in the University*. You should write at least 120 words but no more than 150 words.

(注意: 此部分试题请在答题纸上作答)

My Ideal English Teacher in the University

任课教师: _____

学号: _____

姓名: _____
